Davyd Chung, PhD
Director, DLH Corporation

Dr. Davyd Chung is a molecular biologist by training with experiences as an entrepreneur, NIH program director, faculty member and administrative leader at an academic medical center, and currently a Director at DLH Corporation. In this role, Dr. Chung leads business development, strategic growth and partnerships, and client management. Prior to DLH, he was the Executive Director of Research and Strategic Operations for the University of Illinois-Chicago (UIC) Cancer Center and a Research Assistant Professor in the School of Public Health. He also served in various roles at the NIH, including as a Program Director at the NCI's Center to Reduce Cancer Health Disparities and at the NICHD National Children's Study, leading the operations of a national, multi-site, longitudinal study. He also was an entrepreneur leading a biomedical therapeutics company developed out of the University of Illinois. Dr. Chung earned his Doctorate in Physiological Molecular Biology from the University of Illinois at Urbana-Champaign.

Dr. Sandra Halverson, a cancer epidemiologist by training, is Vice President and Chief Scientist at DLH Corporation, where she previously served as the Director of the Survey Research Center and Project Director of the NIEHS Sister Study. As Chief Scientist, Dr. Halverson is responsible for supporting scientific and research objectives, setting strategic initiatives, and developing research scientists company wide. Prior to joining DLH, she was a tenure-track faculty member and Associate Director of Graduate Studies for the Epidemiology PhD program at Vanderbilt University, a K99/R00 grant recipient, and a Research Contractor in Worldwide Epidemiology at GlaxoSmithKline (GSK). Dr. Halverson earned her Doctorate in Epidemiology from the University of North Carolina at Chapel Hill.

Sandra Halverson, PhD, MPH
Vice President and Chief Scientist
DLH Corporation
